

MAFIA GAME ISOMETRIC UI PROMPTS

Based on the specific React components, CSS, and themes of mafia-game-no8t.onrender.com.

These prompts are designed to replicate the clean, organized 3D "zones" seen in platforms like spatial.chat, but strictly using the analog 1930s and Edo period elements present in your codebase (manila folders, polaroids, ink stamps, etc.).

1. THE 1930S BRIEFING ROOM (DAY PHASE)

Vibe: Clean, organized, daytime noir.

Prompt:

Isometric 3D render of a 1930s detective workspace, UI website background design. A dark, smooth wooden desk surface serving as the base. In the center, a meticulously arranged, thick manila folder stamped with a distressed, bold red 'CLASSIFIED' ink mark. Orbiting the central folder are blank vintage Polaroid photographs attached with metallic paperclips. To the left, an open lined spiral notebook featuring faded typewriter text. To the right, a heavy mechanical file signature stamp and a classic analog pocket watch. Small, subtle metallic objects rest cleanly on the desk representing game roles: a magnifying glass, a porcelain Venetian mask, a small leather medical kit, and a vintage police badge. Lighting is soft, cinematic daylight casting clean, distinct, deep drop shadows to create 3D depth. Color palette: manila beige, dark zinc gray, and crimson red accents. Sleek, minimalist 3D clay-render style mixed with photorealistic macro textures, leaving ample empty negative space in the center and top areas for web interface overlay, 8k resolution, octane render, architectural visualization style --ar 16:9 --stylize 250

2. THE OMERTÀ NIGHT PHASE (DARK MODE)

Vibe: Tense, moody, film noir, matching your #07051a dark background.

Prompt:

Isometric 3D render of a 1930s detective workspace at midnight, UI website background design. A sleek, almost black wooden desk surface. In the center, a highly detailed manila folder barely illuminated by a harsh, dramatic overhead desk lamp. Scattered around the folder are Polaroid mugshots with dark red 'DECEASED' stamps and subtle, glossy crimson blood splatters. Next to the files sits an analog clock, a heavy ink stamp, a discarded matchbook with a flame motif, and a highly polished skull paperweight. The lighting is incredibly moody, film noir style, with deep midnight blue (#07051a) ambient shadows and high-contrast volumetric light beams. The materials are glossy and rich, with the red ink and blood catching the stark light. Clean composition with distinct zones, leaving vast dark negative space for UI elements. 8k resolution, unreal engine 5 render, isometric perspective, highly atmospheric --ar 16:9 --

stylize 300

3. THE YAKUZA / EDO THEME

Vibe: Traditional Japanese, transitioning your core mechanics into an Edo-period aesthetic.

Prompt:

Isometric 3D render of a traditional Japanese Edo-period low table, UI website background design. A dark bamboo and tatami mat surface. In the center sits a thick, folded Washi paper dossier secured with twine, marked with a bright red traditional Japanese Hanko seal stamp. Arranged around the dossier are traditional woodblock-style portrait cards replacing polaroids. To the side, an unfurled rice paper scroll featuring elegant brush calligraphy, a bamboo ink brush, and an antique brass pocket sundial. Subtle thematic objects are placed precisely: a carved wooden kitsune mask, a small medicinal herbal pouch, and a stylized metallic flame crest. Lighting is a soft, atmospheric lantern glow casting long, smooth isometric shadows. Color palette: dark charcoal, faded parchment, deep indigo, and blood red. Clean, modern 3D architectural rendering style, pristine organization, leaving empty negative space for web elements, 8k resolution --ar 16:9 --stylize 250

PRO-TIPS FOR GENERATION:

- Midjourney Aspect Ratios: The "--ar 16:9" parameter is for desktop screens. If you want versions explicitly for your MobileGame.tsx view, change it to "--ar 9:16".
- Negative Prompting: If the AI engine you use supports negative prompts (like Stable Diffusion), use this to keep the background clean: "(modern, glowing neon, living plants, characters, heavy text, cluttered, messy)".
